## CONTAINER SHELTERS

# GENERAL INFORMATION

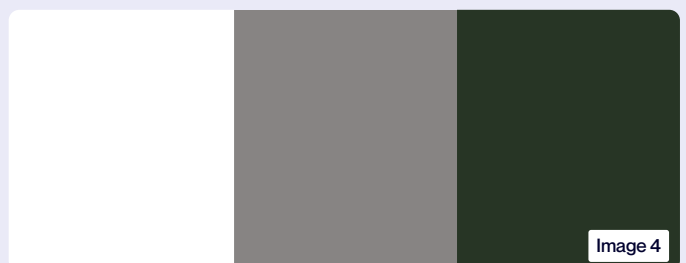

Kroftman offers practical solutions to quickly create workspace or storage on location with innovative container shelters. Using standard shipping containers creates a versatile setup in which the shipping containers and office containers serve as lockable storage, while the container shelter functions as an easily accessible workspace or storage for machines and materials.

With the fastening brackets developed by Kroftman, our container shelters can be effortlessly assembled on almost all shipping containers without damaging them. In addition, Kroftman has developed a practical roll-up door with which the container shelter can be easily closed. Operating this roll-up wall is so user-friendly that one person can do it.

Discover the efficiency and versatility of our container shelters for your specific needs.
